Notes:

██████ to be in Korea April 7-8

April 7: Joint meetup with ██████ (rent out big hotel venue)

April 8: Meeting with ██████ and ██████  
██████ to ping other investors in Korea as well.

If these dates are confirmed I can start moving ASAP

██████ to get back to Steve regarding loan after projections are completed

Ok ██████ is willing to meet April 8

Are they possible investors?

Yes ██████ has a blockchain investing arm now

But they're more like a traditional VC but regardless they're connected with everyone in Korea

It'd be a good meeting

Cool

We have to figure out the ██████ issue

I think I have a solution

What [REDACTED] issue?

Hey

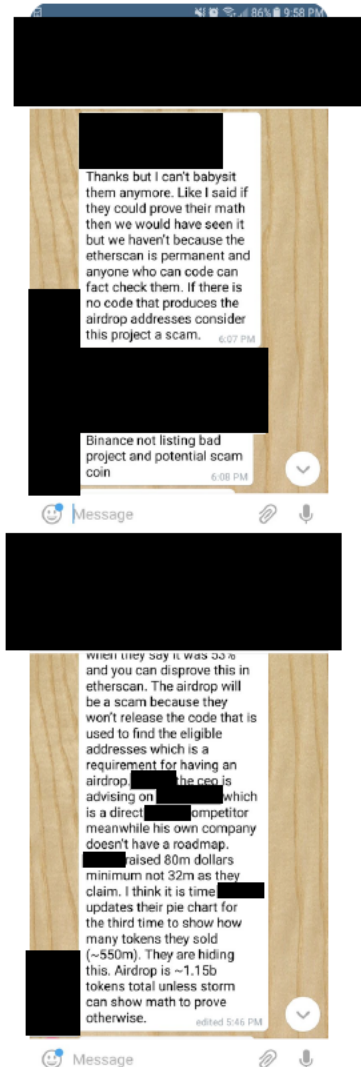

The issue with my non locked up tokens

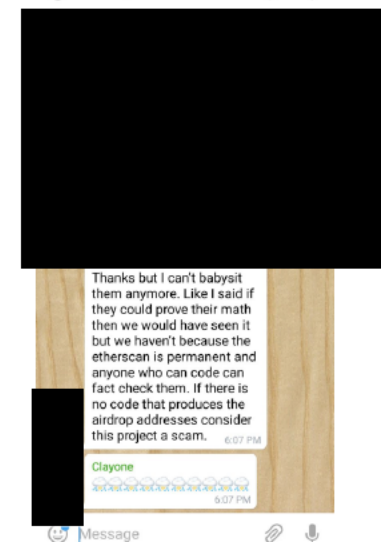

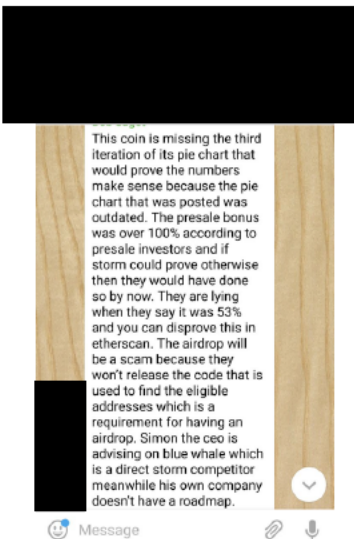

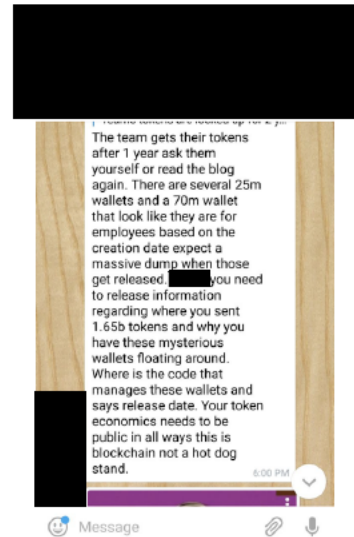

There's no way to distribute it out...

People are constantly watching

We had an agreement

We're already at risk because of the presale

[REDACTED]

This was from this morning

That's not our fault

Presale was oversubscribed because of the wrong spreadsheet

And 100% calculation became 200% because the formulas were wrong

And we didn't have the excel

That has nothing to do with airdropping yo them that already violates

But we stopped selling

If we do the airdrop tokens to your wallet addresses it'll cause 100% noise

Steve you really need to work with us for the long term

You are the single largest holder

If you try and do the airdrop I guarantee you there will be no [REDACTED] left

I have a solution

There will be nothing left

Yes there will

We acquire [REDACTED]

We acquire enough of your cash to purchase just enough tokens for what we would be entitled to for our airdrop

We say [REDACTED] needs these for user purposes

No that will not work

They will naturally drop on the [REDACTED] address's

Everything is public

[REDACTED] this is like potentially hundreds of millions

People will sue

Yes it's fine

[REDACTED]

Steve your risking your entire investment

We purchase them at market

No

There's no one that even comes close to you

I don't even own any [REDACTED]

None of the founders even

3/21/18, 1:20 PM

Hey [REDACTED]

You there?

3/23/18, 8:02 PM

Are you witnessing the magic of Korea?? [REDACTED]

And Korea is just waking up now

We might break a Guinness world record!!

Holy shit!

Where is this going!?

We might break a record

[REDACTED]

[REDACTED]

We already surpassed [REDACTED] when they were sleeping

Is any of this volume the market makers?

\$0
